

Considerando 3 subestruturas simples:

$$n_{eq} = \underbrace{3}_I + \underbrace{3}_{II} + \underbrace{3}_{III} = 9$$

$$n_{var} = \underbrace{3}_I + \underbrace{2+2}_{II} + \underbrace{2}_{III} = 11$$

$$g_h = n_{var} - n_{eq} = 11 - 9 = 2$$
