

$$n_{gl} = \underbrace{3}_C + \underbrace{(2 + 3)}_D = 8$$

Considerando 4 subestruturas simples:

$$n_{eq} = 3 + 3 + 3 + 3 = 12$$

$$n_{var} = 9 + 2 + 2 + 3 = 16$$

$$g_h = n_{var} - n_{eq} = 16 - 12 = 4$$
