

$$n_{gl} = \underbrace{1}_A + \underbrace{1}_B + \underbrace{1}_C + \underbrace{3}_D + \left(\underbrace{3+1}_E \right) + \underbrace{3}_F + \underbrace{3}_G = 16$$

$$n_{eq} = 3 + 3 + 3 = 9$$

$$n_{var} = 6 + 4 + 4 = 14$$

$$g_h = n_{var} - n_{eq} = 14 - 9 = 5$$
